

# Telehealth Worksheet

1. Does the client have reasonable access to virtual communication (e.g., WIFI, computer or tablet, etc.)?

If yes, continue to next question

If no, contact insurance to provide equipment based on medical necessity

2. Does the client engage in maladaptive behavior that require physical prompting (e.g., aggression, SIB, elopement)? If so, are caregivers proficient enough with ABA procedures to implement effective physical prompts?

If yes, continue to next question

If no, address in caregiver training (97156)

3. Does the client have a generalized imitation repertoire?

If yes, continue to next question

If no, address in caregiver training (97156)

4. If no, can programming be modified to teach skills without modeling?

If yes, continue to next question

If no, address in caregiver training (97156)

5. Are caregivers fluent enough with behavior intervention plans to implement independently with procedural fidelity?

If yes, continue to next question

If no, address in caregiver training (97156)

6. Can the client attend to a task for extended period of time (with or without verbal prompting)?

If yes, RBT services are appropriate (97153)

If no, address in caregiver training (97156) AND complete shortened RBT session (97153)
